The Approved Applicator Program was created to ensure that the quality that goes into creating the product also applies to the application of the product in the field. Kemper System America invests highly in a quality control program and our Technical Field Department is there to support the Applicators.

We are always interested in top-tier applicators. Please contact our Warranty Department for any information or assistance with the program, 716-712-9923 or warranty@kempersystem.com.

Evaluation of Prospective Applicators

A contractor's request to become an approved applicator requires sponsorship by a KSA Account Executive and/or Regional Manager. All applicator forms are available on the Kemper System website, www.kempersystem.net, under the Contractor's Corner tab.

Once the forms are received they are reviewed for accuracy and a comprehensive company background search is performed. In order to take part in the Approved Applicator Program, the contractor must agree to the terms of the Approved Applicator Agreement.

Approval Process

All documents should be fully completed before submission to ensure efficient processing. The forms must be approved before an Approved Applicator letter can be provided for the bid submission process.

Identification Badges

The trained personnel will have their information and picture taken at the end of the training. An ID badge will be generated and forwarded to the contractor. Requests for missing badges may be submitted to warranty@kempersystem.com. Badges must be present on all personnel on job sites at all times.
